

# EcoFert, Inc.

## Cemeteries Can Save Money and Enhance Aesthetics

The EcoFert Programs significantly decrease water use, reduced labor, equipment and utility costs, protect from potential staining and degradation to stonework, and promote healthy looking landscapes. Cemetery clients affirm the benefits of the Programs, as proclaimed by Michael Wesner, director of cemeteries for the Catholic Diocese of Orange: “We've really struggled with trying to keep the cemetery [Holy Sepulcher Cemetery in Orange] acceptable aesthetically. We wanted to stay within our water allotment. With this [EcoFert] program, we were able to stay within our restrictions and stay green.”

*EcoFert's Catholic Diocese of Orange cemetery properties include:*

- Holy Sepulcher Cemetery (Orange) – A 32 acre park that EcoFert has serviced since April 2012.
- Ascension Cemetery (Lake Forest) – An 8 acre landscape that EcoFert has serviced since February 2013.
- Christ Cathedral – A multi use 10 acre facility.

*Ecofert's Orange County Cemetery properties include:*

- El Toro Cemetery – A 20 acre park that EcoFert has serviced since August 2013.
- Anaheim Cemetery – A 12 acre landscape that EcoFert has serviced since August of 2013.
- Santa Ana Cemetery – A 23 acre property that EcoFert has serviced since August of 2013.

Other cemetery clients:

- Temecula Cemetery – A 7.5 acre park that EcoFert has serviced since July of 2015.
- Pomeroado Cemetery District – A 7.5 acre park in Poway that has been serviced since April of 2018.
- 

Ecofert will provide prospective clients with a complimentary property assessment and laboratory soils analysis.
