

EcoFert, Inc.

TUSTIN CITY REPORT

OVERVIEW

Tustin's Sports Park has the distinction of being EcoFert's longest serviced property, with the Soil Fertility Program having been applied to since October of 2011. With successful results at the Sports Park and three other facilities, Tustin went "all in" with EcoFert in 2015, bringing to 16 the number of parks serviced. All of these facilities also benefit from either the EcoFert Water Treatment Program or Water Conservation Program.
